DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 12-18 and 59-63 are rejected under 35 U.S.C. 102(b) as being anticipated by Faulk (5,764,495).

Faulk discloses the present invention substantially as claimed including a current input circuit to generate a maximum duty cycle adjustment signal, and a control circuit to generate a switching waveform to a maximum value in response to the maximum duty cycle adjustment signal to regulate a power supply output.
